

October 2024

Hello Rene,

Welcome to our second Newsletter of 2024!

Happy Halloween!

After a very hot summer and significant weather events, let us hope for a cooler and calmer remaining fall season.

We are always thankful for the relationships that we have formed with many of you and we are excited to be working with several new college students that started using our hardware/software late summer into this fall.

For those new to us, Welcome! We'd like to share our mission. It is simply to help Florida's special needs children and adults enjoy the transformative power of technology.

We believe early intervention with cognitive technology can enhance the ability for individuals with developmental challenges to learn and grow.

We invite you to read the rest of our newsletter to learn about:

FCSUA- a program that supports the development and approval of Florida Postsecondary Comprehensive Transition Programs (FPCTPs). and provides FPCTP initial and continuing grants to universities, state colleges, and technical colleges;

an organization called SHIFT that advocates for the adoption and implementation of technology so that people with disabilities have the opportunity to live the lives they want to live;

and meet a student pursuing their college dream through one of Florida's Post-secondary Comprehensive Transition Programs.

TEK TALK!

N-Able
TEK

Florida Center for Students with Unique Abilities

The purpose of the Florida Center for Students with Unique Abilities (FCSUA) is to provide support to students, families, and institutions of higher education so that students with intellectual disabilities have opportunities for on-campus college experiences that lead to employment opportunities.

N-Able TEK

Learn about TechFirstShift who is using an online education and accreditation platform for providers. It embraces the application of technology as the first consideration in support planning. This means people with disabilities can live their most independent, productive lives possible with the supportive care of trained humans paired with the modern benefits of technology.

N-Able TEK

Learn about some people and places who are using cognitive technology through N-AbleTek

Students at various places are using the hardware and software provided by N-AbleTek to increase their independence.

In this newsletter we are highlighting one student who is currently using the technology as they embark on their college journey.

Meet Liliana!

I live with: My parents.

School/Education/Job

Accomplishments: I attend FGCU RISE and work at Little Eagles.

Hobbies/Interests: I love painting, crocheting, and crafting.

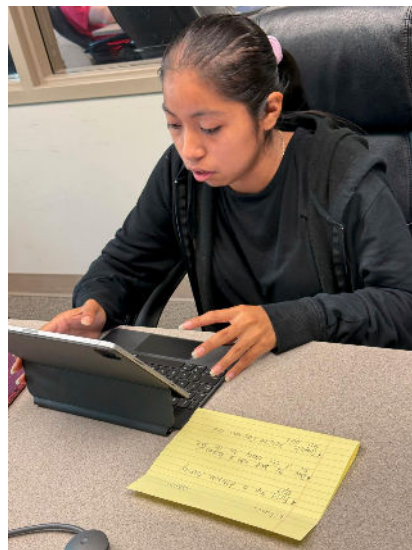

Favorite Food: Tamales

Favorite Movie: Scream

Favorite Music: Selena Gomez

How has the N-AbleTek technology helped you as you pursue your College Certificate Program?

It helps me learn new technologies that I never used before. It helps me find events and what's happening. It enables me to complete assignments.

Please click on the links below to see some of the places that work with us to increase opportunities for independent learning, working and living!
